

Zeremis[®] Carbon Neutral Downstream

Certificate for mass balanced CO₂ emissions reduction

Issue to Downstream site: Service Center Gelsenkirchen GmbH

Site address: Grimbergstrasse 75
45889 Gelsenkirchen
Germany

Presented on: 8 March 2024

Independent review

DNV is commissioned to provide a limited assurance engagement in accordance with the International Standard on Assurance Engagements (ISAE) 3000 over carbon emissions data relevant to Tata Steel's Zeremis scheme.

DNV performed a remote independent review of scope 1 and 2 carbon emissions data and measures taken to eliminate these emissions, at Tata Steel's aforementioned site. In our opinion, the data and evidence we reviewed support the findings of Tata Steel's internal audit process and the claim of carbon neutrality for this site.

Together towards a zero-carbon emissions, circular world
